

Mohsen Saeidi

Lead Software Engineer | Java · Microservices · Cloud

✉ saeidi.mhsn@gmail.com 🔗 <https://mohsensaeidi.ir/>

📍 Munich, Germany

👤 PROFESSIONAL SUMMARY

Lead Software Engineer with 14+ years building enterprise-scale Java systems, including 4 years leading teams and owning architecture for high-availability platforms. Skilled in agile methodologies and known for delivering high-quality solutions in fast-paced, collaborative environments. A reliable, organized team player with excellent communication skills and a commitment to continuous improvement. Brings deep technical expertise and leadership experience to drive success in challenging projects.

🧠 SKILLS

Languages & Frameworks: Java 21/17/11, Spring / Spring Boot, Hibernate, C, C++, C#, Python, SAP Hybris

Architecture: Microservices, System Design,DDD, TDD, Cloud-based & Distributed Architecture

Cloud & DevOps: Docker, Kubernetes, Terraform, Ansible, Jenkins, CI/CD, Dynatrace, Prometheus, Grafana

Data & Security: PostgreSQL, MySQL, Oracle, MsSQL, NoSQL, Redis, RabbitMQ, CAS/SSO authentication

Practices: Agile/Scrum, Code Review, Unit Test Automation, Mentoring, Bug Tracking & Troubleshooting

📁 WORK EXPERIENCE

Hoffmann group

Lead Software Engineer

01.2025 – Present
Munich, Germany

- Lead a team of 10 engineers through a large-scale cloud migration, owning architecture decisions and driving the transition from legacy infrastructure to a scalable cloud-based platform.
- Analyze business and technical requirements to design customized, maintainable solutions, focusing on high availability, reliability, and system performance under production load.
- Set technical direction and best practices for the team, conducting code reviews and mentoring engineers to raise code quality and delivery speed.

Senior Software Engineer

07.2021 – 12.2024
Munich, Germany

- Designed and built custom microservices-style modules for a feature-rich B2B/B2C e-commerce platform on SAP Hybris Commerce 2211, prioritizing scalability and maintainability.
- Owned CI/CD pipelines using Jenkins, Ansible, and Terraform to automate builds, testing, and deployment, reducing release friction across environments.

Technologies: SAP Hybris Commerce 2211, Java 21, Spring Framework, Dynatrace, Docker, Jenkins, Ansible, Terraform, MsSQL, Prometheus, Grafana, REST, Bitbucket

Code It Labs

Senior Software Engineer

03.2020 – 06.2021
Munich, Germany

- Translated client business requirements into technical designs, then developed and customized backend modules as an SAP Commerce (Hybris) developer.
- Built and consumed REST and SOAP services, and GraphQL APIs, integrating multiple backend systems for enterprise clients.

Technologies: SAP Hybris Commerce 1905, Java 11, Spring Framework, GraphQL, MySQL, Maven/Gradle, Git

Fanap

Technical Lead Engineer

06.2017 – 02.2020
Tehran, Iran

- Led software design efforts for enterprise systems, setting coding standards and best practices across the engineering team.
- Conducted code reviews and mentored junior engineers, improving overall code quality and team delivery consistency.

Software Engineer

06.2013 – 05.2017
Tehran, Iran

- Built core modules of an enterprise-level Java/Spring insurance platform, including quotations, claims processing, and financial accounting.
- Implemented authentication and session management using CAS/SSO, and integrated messaging and caching with RabbitMQ and Redis — directly relevant experience for secure, scalable authentication systems.

Technologies: Java EE, Spring, Hibernate, JSF 2.0, CAS/SSO, Oracle DB, Tomcat, RabbitMQ, Redis, Maven, SOAP, RESTful APIs, Git

Karnik System

08.2012 – 06.2013
Tehran, Iran

Junior Software Engineer

- Contributed to a large-scale ERP/CRM project using Java EE and Struts 2.0, building foundational enterprise development experience.

EDUCATION

Master of Science in Computer Networks

09.2016 – 06.2019
Tehran, Iran

Sharif University of Technology

Thesis: Designed and implemented network coding algorithms to enhance the performance of MapReduce frameworks. Technologies used: Hadoop, Apache Spark, Java, Python, AWS, StarCluster.

Bachelor of Science in Information Technology

09.2011 – 08.2015
Tehran, Iran

University of Tehran

LANGUAGES

- English
- German
- Persian
- Arabic

CERTIFICATES AND AWARDS

- SAP Certified Development Professional - SAP Commerce Cloud 1905 Developer, issued by SAP SE (2020) 
- Top 1% among 100,000+ participants, Iran BSc university entrance exam
- 16th of 20,000 participants, Iran MSc entrance exam, Computer Engineering (2016)
- Stack Overflow high reputation and participation (<https://bit.ly/4rBwnoT>) 
- 1st place, RoboCup 2D Soccer Simulation competitions, Iran (2009)
